Online Store Packages

Dontae Amare · Independent freelance web developer

I build custom online stores that you run yourself, for a one-time fee starting at $2,500, with no monthly platform fee beyond about $20 for hosting. You add products, upload photos, change prices, track stock and ship orders from your own dashboard, on your phone or computer.

See one live: darewear.store, built and launched on this exact setup.

Built from scratch, by me

I'm an independent freelance web developer, not an agency or a template shop. Every store is designed and coded completely from scratch for your brand, with no pre-designed themes, templates or drag-and-drop builders. You also get full, integrated access to everything: the code, your store dashboard, and every account it runs on (domain, hosting, Stripe, email), all set up in your name.

Packages

Both packages include up to 15 products loaded for you and 2 rounds of revisions.

	Starter Store	Full Launch
Price (one-time)	**$2,500**	**$3,000**
Store branded to your logo, colors and fonts	Yes	Yes
Checkout with cards, Apple Pay and Google Pay (Stripe)	Yes	Yes
Your own domain (yourbrand.com)	Yes	Yes
Dashboard to add, edit and hide products and upload photos	Yes	Yes
Stock tracking that stops overselling	Yes	Yes
Order alerts, shipping and tracking emails from your domain	Yes	Yes
Shipping, returns, privacy and terms pages	Yes	Yes
Email and text sign-up form with a welcome discount code	No	Yes
Traffic analytics	No	Yes
Google Search setup and sitemap	No	Yes
Branded previews when your links are shared on Instagram, iMessage and X	No	Yes
Full launch test with a real order	No	Yes

Most brands launching a new line want Full Launch: it's the full setup behind darewear.store.

How the price compares

For reference, here is what online store builds typically cost elsewhere in 2026. Prices vary by developer, location and scope.

Option	Typical price
Do-it-yourself on Shopify, Wix or Squarespace	$180–$400 for a premium theme, plus the monthly plan and your own time
Freelancer setting up a Shopify store on a template	$2,500–$5,000
Customizing an existing Shopify theme	$1,000–$8,000
Custom-designed store from a developer or agency	$5,000–$25,000
Full custom store build from an agency	$10,000–$50,000+

My packages are priced in the range freelancers often charge to set up a store on a template, but every page of yours is designed and coded from scratch.

Price ranges from 2026 guides published by CartCoders, First Pier and Project Cost Estimator.

Founding client offer

My first two clients get the founding rate: **Starter Store $1,500** (standard $2,500) and **Full Launch $2,000** (standard $3,000). In return, I ask for a short testimonial and permission to show your store in my portfolio.

Monthly plans (optional)

You own and run your store either way. A plan keeps me on call for it.

Plan	Price	What's covered
Self-managed	$50/month	You run products and stock. I handle fixes, questions and keeping payments, email and hosting connected.
Managed	$150/month	Everything in Self-managed, plus I upload new products, change prices and make small design updates for you.

Cancel anytime with 30 days' notice.

Add-ons

Add-on	Price
Loading products beyond the first 15	$15 each
Product photos	$40 each
Automated welcome and abandoned-cart emails	$250
Text message (SMS) number setup and registration	$150
Sales tax setup at checkout	$100
Rush delivery (launch in under a week)	+25% of package

What you pay to run it

Your store costs about $20 a month to run, against $39 a month for Shopify's Basic plan before apps and themes. You pay these directly, on accounts in your name.

Cost	This store	Shopify Basic
Platform / hosting	$20/month (Vercel Pro; the free plan is non-commercial only)	$39/month billed monthly, $29 billed yearly (Shopify pricing)
Card processing	2.9% + 30¢ per sale (Stripe)	2.9% + 30¢ per sale (Shopify Payments)
Domain	About $10–20/year	About $10–20/year
Email and text sign-ups	Klaviyo, free to start	Klaviyo or Shopify Email, free to start
Paid theme	None, your design is custom	Often $200–400 one-time

Text messages are billed by Klaviyo per message sent, only if you use them.

How it works

Most stores launch in 2–3 weeks from the day I have your logo, photos and product details.

1. **Kickoff call.** We pick your package, and you send your logo, brand colors, product photos, prices and sizes.
2. **50% deposit** to book your start date.
3. **Build.** I set up your store and every account in your name (domain, hosting, Stripe, email), with me added as a helper. You own all of it.
4. **Review.** You click through a preview and send changes. Two rounds of revisions are included.
5. **Launch.** I run a real test order, then put the store live. The remaining 50% is due at launch.
6. **Handoff.** A walkthrough of your dashboard: adding products, updating stock, and shipping orders.

Next step

Book a free 20-minute call to talk through your brand and which package fits.
